

Dear Client,

We're excited to share some important updates with you about our latest progress and continued commitment to providing industry-leading material testing services.

1. SANAS Accreditation – Evaluation Completed

We're proud to announce that we have successfully completed the SANAS accreditation evaluation process in accordance with ISO/IEC 17025 standards. [T0954]

This achievement reflects the high level of technical competence and operational integrity we bring to every project — giving you added confidence in the accuracy and reliability of our results.

2. Performance Highlights

We remain focused on supporting your timelines and project goals with fast, dependable service.

- **92% of test reports** delivered within **48 hours**
- Enhanced internal review process for **greater accuracy**
- Expanded testing capacity to meet increasing demand

3. What Sets Us Apart

At Consoil, quality isn't just a box we tick — it's a principle we live by.

Every test goes through:

- Strict internal verification
- Calibrated, compliant equipment
- Skilled technicians with hands-on expertise

You're not just getting numbers on a page — you're getting dependable data that informs safe, effective engineering decisions.

4. Why This Matters to You

By choosing an accredited and performance-driven lab, you're choosing risk reduction, compliance peace of mind, and reliable results that keep your projects moving forward with confidence.

Let's Talk
